CV

General Information

Full Name	Haoyuan Peng - 彭浩源
Date of Birth	9th July 1994
Email	phy_fdu@163.com
Homepage	haoyuanpeng.github.io

Education

2015 - 2018

Master's degree, Computer Science

Software School of Fudan University

- Under the supervision of Prof. Zheng Xiaoqing, I studied state-of-the-art NLP research. Our research interests mainly lie in pre-training word embeddings and dependency parsing. Our works are published in AAAI-2017 and AAAI-2018.
- I participated in the development of FudanDNN-NLP, a deep learning-based natural language processing tool.
- I was awarded a postgraduate freshman scholarship in 2015.
- I was selected as an Outstanding Graduate in Shanghai in 2018.

2011 - 2015

Bachelor's degree, Computer Software Engineering

Software School of Fudan University

- Under the supervision of Prof. Zheng Xiaoqing, I have been conducting research on natural language processing since 2013. Our work is published in IJCAI-2015.
- I was awarded the Third Prize of the Scholarship for OutStanding Students at Fudan University in the 2014-2015 academic year.
- I have participated in Fudan's Undergraduate Experiment and Practice Opportunities Program from 2013 to 2015 under the guidance of Prof. Zheng Xiaoqing, and passed the thesis defence.

Experience

2023 - PRESENT

Senior Algorithm Engineer

Learnable.AI, Shanghai, China

- Engaging in applied research on the direction of K-12 auto-grading system. Transforming large language models (LLMs) and seq2seq models into real-world applications, such as translating arbitrary answers written by students in natural language into an internally defined formal language.

2021 - 2022

Senior Researcher

Tencent, Shanghai, China

- Yunzhi Media AI Platform - Responsible for the text error correction, video labeling and key information extraction algorithms of multimodal content structuring in Tencent Yunzhi Media AI Platform, which has won the *CCBN 2021 Product Innovation Excellence Award*. The labeling algorithm I was responsible for won the 2nd place in the *2021 AIWIN Algorithm Technology Competition* without training with the competition training data.
- Text Censorship - Developing a text censorship system for private project clients. The system contains models and policies, and can address adversarial user inputs.

2018 - 2021

Applied Researcher

Tencent, Shanghai, China

- Intelligent Public Opinion Analysis System - Responsible for the overall algorithm scheme and completed the development and optimization of multiple NLP algorithms. This product is customized for securities industry regulators.
- Tencent Cloud NLP Products - Responsible for the development of general text matching and Chinese spelling correction algorithms, which are deployed on Tencent Cloud and applied in several custom projects.
- Tencent TI-ONE ML Platform - Implemented multiple traditional ML algorithms and deep learning based NLP algorithms on Tencent TI-ONE ML Platform for users to train models on their custom data.

2014 - 2015

Data Analyst Intern

eBay, Shanghai, China

Skills

Following the cutting-edge research in the field of natural language processing. Experienced in publishing papers in top international academic conferences.

Knowledge in full life cycle AI/ML with learning, inference, engineering and integration.

Proficient in Python and able to write high-quality Python code.

Familiar with mainstream deep learning frameworks, including pytorch, tensorflow 1.x and tensorflow 2.x.

Service

Conference Reviewer: KDD-2023

External Reviewer: ACL-2023, ECAI-2023

Honors and Awards

2021

- Second Place of AIWIN 2021 Algorithm Technology Competition

2020

- Tencent New Code Culture Award - Award for outstanding internal open source code projects

2018

- Outstanding Graduate in Shanghai

2015

- Postgraduate Freshman Scholarship

Publications

2023

OSAN: A One-Stage Alignment Network To Unify Multimodal Alignment and Unsupervised Domain Adaptation

Liu, Ye and Qiao, Lingfeng and Lu, Changchong and Yin, Di and Lin, Chen and **Peng, Haoyuan** and Ren, Bo. *Proceedings of the IEEE/CVF Conference on Computer Vision and Pattern Recognition (CVPR).*

2022

Grafting Pre-trained Models for Multimodal Headline Generation

Qiao, Lingfeng and Wu, Chen and Liu, Ye and **Peng, Haoyuan** and Yin, Di and Ren, Bo. *Proceedings of the 2022 Conference on Empirical Methods in Natural Language Processing: Industry Track.*

2019

Detecting Abnormal Start-Ups, Unusual Resource Consumptions of the Smart Phone: A Deep Learning Approach

ZHENG, Xiaoqing and LU, Yaping and **PENG, Haoyuan** and FENG, Jiangtao and ZHOU, Yi and JIANG, Min and MA, Li and ZHANG, Ji and JI, Jie. *ZTE Communications.*

2018

Attention-based belief or disbelief feature extraction for dependency parsing

Peng, Haoyuan and Liu, Lu and Zhou, Yi and Zhou, Junying and Zheng, Xiaoqing. *Proceedings of the AAAI Conference on Artificial Intelligence.*

2018

RNN-based sequence-preserved attention for dependency parsing

Zhou, Yi and Zhou, Junying and Liu, Lu and Feng, Jiangtao and **Peng, Haoyuan** and Zheng, Xiaoqing. *Proceedings of the AAAI Conference on Artificial Intelligence.*

2017

Learning context-specific word/character embeddings

Zheng, Xiaoqing and Feng, Jiangtao and Chen, Yi and **Peng, Haoyuan** and Zhang, Wenqing. *Proceedings of the AAAI Conference on Artificial Intelligence.*

2015

Character-based parsing with convolutional neural network

Zheng, Xiaoqing and **Peng, Haoyuan** and Chen, Yi and Zhang, Pengjing and Zhang, Wenqiang. *Twenty-Fourth International Joint Conference on Artificial Intelligence.*
